# FLUID MILK AND CREAM REPORT

JULY 1969

Release:  
July 22, 1969  
3:00 P.M. EDT

## MILK PRICE HIGHLIGHTS

Class I Prices: The July price paid by dealers for milk used for fluid purposes (Class I) averaged \$6.74 per hundredweight for about 155 markets. This was up slightly from June and 16 cents above a year earlier. Regional averages were 20 cents or more above July 1968 in New England, Mid-Atlantic, and Pacific Regions, according to the Crop Reporting Board.

Store milk prices: Store prices to consumers in 25 cities in early July averaged 54.9 cents per half gallon for the most common grade of whole milk. This was about  $2\frac{1}{2}$  cents above a year earlier and 4 cents above July 1967.

Home-delivered prices: Half gallon prices for home-delivered milk averaged  $2\frac{1}{2}$  cents above a year earlier and nearly 5 cents above July 1967. The home delivered prices represent list prices before deductions for quantity and other discounts.

## SALES OF FLUID DAIRY PRODUCTS AND RECEIPTS OF MILK FROM PRODUCERS

Preliminary May sales: Preliminary data on total sales of fluid dairy products during May for nearly 70 marketing areas averaged about the same as a year earlier.

April sales: Total sales of fluid products for April in regulated markets also averaged about the same as a year earlier.

Whole milk sales during April were down about 2 percent from 1968.

Low-fat and skim milk sales in April were up 11 percent from a year earlier. Sales of these products during the first four months of 1969 were up 12 percent from the same period of 1968.

Milk and cream mixture sales (mostly half and half) averaged 7 percent below April 1968 and cream sales were down about 10 percent.

Milk receipts: May receipts of milk from producers at plants regulated for about 65 marketing areas were up about 2 percent from a year earlier. The number of producers delivering milk to plants for the same markets was down 3 percent from May 1968.

Milk production: U. S. milk production during June was estimated at 10.8 billion pounds -- down about 1 percent from a year earlier. June output provided 1.77 pounds of milk per person daily for all uses, compared with 1.80 pounds a year earlier.

1/ Regional and U.S. average based on prices for individual markets weighted by population. Prices for Federal-order markets include prevailing premiums above minimum Class I prices, as reported by principal producers' associations. Premiums may not apply to all Class I milk. Prices in this table do not represent returns to producers. Blend prices paid to producers, based on proportions used in fluid and manufactured products, are shown by markets in Table 6. 2/ Revised.

# FLUID MILK AND CREAM REPORT

AUGUST 1969

LIPPINCOTT LIBRARY  
AUG 29 1969

Release:  
August 20, 1969  
3:00 P.M. EDT

## MILK PRICE HIGHLIGHTS

Class I Prices: The August price paid by dealers for milk used for fluid purposes (Class I) averaged \$6.78 per hundred-weight for about 155 markets -- up 4 cents from July. Prices generally increased 17 to 30 cents from July over most of Michigan, Ohio, western Pennsylvania, western West Virginia, southwestern Virginia, Kentucky, and Tennessee. Class I prices in most of Georgia increased 51 cents as a result of a 20-cent increase in the Georgia Federal Order price and a 31-cent negotiated premium. Most other markets were unchanged to 2 cents above July 1969 levels.

August Class I milk prices were 19 cents above a year earlier. Regional increases ranged from 3 cents for Mountain area markets to 25 cents for the East South Central markets.

Store milk prices: Store prices to consumers in 25 cities in early August averaged 54.7 cents per half-gallon for the most common grade of whole milk. This was about the same as July 1969 and nearly 2 cents above August 1968.

Home-delivered prices: Half-gallon prices for home-delivered milk averaged slightly above a month earlier, but more than  $2\frac{1}{2}$  cents above a year earlier. The home-delivered prices represent list prices before deduction for quantity and other discounts.

# SALES OF FLUID DAIRY PRODUCTS AND RECEIPTS OF MILK FROM PRODUCERS

Preliminary June sales: Preliminary data on total sales of fluid dairy products during June 1969 for nearly 70 marketing areas averaged about the same as a year earlier.

May sales: Total sales of fluid products for May in regulated markets averaged about 1 percent above a year earlier.

Whole milk sales during May were down 2 percent from May 1968. Cumulative sales for the first 5 months of 1969 were also 2 percent below a year earlier.

Low-fat and skim milk sales in May were up 12 percent from a year earlier.

Milk and cream mixture sales (mostly half-and-half) averaged 5 percent below May 1968.

Total sweet and sour cream sales combined for the 59 Federal and 8 State marketing areas for which comparable data are available were 5 percent below May 1968. Cumulative sales for the first 5 months of 1969 were about 8 percent below a year earlier for the cream items.

Milk receipts: June receipts of milk from producers at plants regulated for about 65 marketing areas were up nearly 2 percent from a year earlier. The number of producers delivering milk to plants for the same markets was down about 4 percent from June 1969.

Milk production: U. S. milk production during July was estimated at 10.2 billion pounds -- down less than 1 percent from a year earlier. July output provided 1.61 pounds of milk per person daily for all uses, compared with 1.63 pounds a year earlier.

1/ Regional and U.S. average based on prices for individual markets weighted by population. Prices for Federal-order markets include prevailing premiums above minimum Class I prices, as reported by principal producers' associations. Premiums may not apply to all Class I milk. Prices in this table do not represent returns to producers. Blend prices paid to producers, based on proportions used in fluid and manufactured products, are shown by markets in Table 6.

# FLUID MILK AND CREAM REPORT

LIPPMOTT LIBRARY

OCT 2 1969

SEPTEMBER 1969

Release:

September 22, 1969

3:00 P. M. EDT

## MILK PRICE HIGHLIGHTS

Class I prices: The September price paid by dealers for milk used for fluid purposes (Class I) averaged \$6.83 per cwt. for about 155 markets--up 5 cents from August. In Virginia and Louisiana, Class I prices increased significantly--about 30 cents over last month.

September Class I milk price for reporting markets averaged 19 cents above a year earlier. Regional increases ranged from 6 cents in the West North Central Region to 27 cents in the South Atlantic.

Store milk prices: Store prices to consumers in 25 cities in early September averaged 54.9 cents per half-gallon for the most common grade of whole milk. This was about the same as August but nearly 2 cents above a year earlier.

Home-delivered prices: Half-gallon prices for home-delivered milk averaged 62.7 cents per half-gallon. This was  $\frac{1}{2}$  cent above a month ago and nearly 3 cents above September 1968. Home-delivered prices represent list prices before deductions for quantity and other discounts.

## SALES OF FLUID DAIRY PRODUCTS AND RECEIPTS OF MILK FROM PRODUCERS

Preliminary July sales: Preliminary data on total sales of fluid dairy products during July 1969 for nearly 70 marketing areas averaged the same as a year earlier.

June sales: Total sales of fluid products for June in regulated markets averaged nearly one-half percent above a year earlier. Cumulative sales for the first half of 1969 also averaged about one-half percent above a year ago.

Whole milk sales were down  $2\frac{1}{2}$  percent from a year earlier in June and down 2 percent for the first half of the year.

Low-fat and skim milk sales in June were up 12 percent from a year earlier.

Milk and cream mixture sales (mostly half and half) averaged 5 percent below June 1968. For the first half of 1969, cream mixture sales were down 6 percent from the same period a year earlier.

Total sweet and sour cream sales in marketing areas for which comparable data are available were down 4 percent from June 1968. Total sales for the first 6 months of 1969 were 7 percent below a year earlier.

Milk receipts: July receipts of milk from producers at plants regulated for 65 marketing areas (57 Federal and 8 State) were up  $2\frac{1}{2}$  percent from a year earlier. The number of producers delivering milk to plants for these same markets was down about  $3\frac{1}{2}$  percent from July 1969.

Milk production: U. S. milk production during August was estimated at 9.6 billion pounds--up one-half percent from a year earlier. August output provided 1.52 pounds of milk per person daily for all uses, compared with 1.53 a year earlier.

1/ Regional and U.S. average based on prices for individual markets weighted by population. Prices for Federal-order markets include prevailing premiums above minimum Class I prices, as reported by principal producers' associations. Premiums may not apply to all Class I milk. Prices in this table do not represent returns to producers. Blend prices paid to producers, based on proportions used in fluid and manufactured products, are shown by markets in Table 6.

SALES OF FLUID DAIRY PRODUCTS AND RECEIPTS  
OF MILK FROM PRODUCERS

Preliminary August sales: Preliminary data for August on average daily sales of fluid dairy products in nearly 70 marketing areas averaged  $2\frac{1}{2}$  percent below a year earlier. An additional Sunday in August 1969 reduced daily average sales. Sales for the first 8 months of 1969 have averaged about the same as a year earlier.

July sales: Total sales of fluid products for July in regulated markets averaged nearly the same as a year earlier.

Whole milk sales in July were down about 3 percent from a year earlier.

Low-fat and skim milk sales in July were up 13 percent from a year earlier.

Milk and cream mixture sales (mostly half and half) averaged 8 percent below 1968. Total sweet and sour cream sales in marketing areas for which comparable data are available were down 7 percent from July 1968.

Milk receipts: August receipts of milk from producers at plants regulated for 65 marketing areas (57 Federal and 8 State) were up 4 percent from a year earlier. The number of producers delivering milk to plants for these same markets was down 3 percent from August 1968.

Milk production: U. S. milk production in September was estimated at 9.1 billion pounds -- up 1 percent from a year earlier. Daily average production for September was down 2 percent from August. September output provided 1.49 pounds of milk per person daily, for all uses, the same as a year earlier but down seasonally from the 1.52 pounds in August.

September milk production equaled or exceeded a year earlier in most States of the North Atlantic, East North Central and South Atlantic Regions. Production changes were mixed in the South Central and West and mostly down in the West North Central Region.

1/ Regional and U.S. average based on prices for individual markets weighted by population. Prices for Federal-order markets include prevailing premiums above minimum Class I prices, as reported by principal producers' associations. Premiums may not apply to all Class I milk. Prices in this table do not represent returns to producers. Blend prices paid to producers, based on proportions used in fluid and manufactured products, are shown by markets in Table 6. 2/ Revised.

# FLUID MILK AND CREAM REPORT

NOVEMBER 1969

LIBRARY

DEC 10 1969

Release:

November 20, 1969

3:00 P.M. EST

## MILK PRICE HIGHLIGHTS

Class I prices: November prices paid by dealers for milk used for fluid purposes (Class I) averaged \$6.92 per cwt. for about 155 markets--up 5 cents from October and 23 cents above a year earlier.

Regional averages ranged from unchanged to 9 cents higher than in October. Compared with a year earlier, regional prices ranged from 14 to 29 cents higher, according to the Crop Reporting Board.

Store milk prices: Store prices to consumers in 25 cities during early November averaged about 55 cents per half-gallon for whole milk. This was up slightly from October as Pittsburgh, Kansas City, and Omaha prices increased 2 to 4 cents per half-gallon. The November average was  $1\frac{1}{2}$  cents above a year earlier.

Home-delivered prices: Half-gallon prices for home-delivered milk averaged nearly  $63\frac{1}{2}$  cents per half-gallon. This was about  $\frac{1}{2}$  cent above a month ago and 3 cents above a year earlier. Home-delivered prices represent list prices before quantity and other discounts.

SALES OF FLUID DAIRY PRODUCTS AND RECEIPTS  
OF MILK FROM PRODUCERS

Preliminary September sales: Preliminary data for September on average daily sales of fluid dairy products in 65 marketing areas (60 Federal and 5 State) averaged 3 percent above a year earlier. September 1969 had one less Sunday than September 1968--this contributed to the increase in average daily sales. Total sales for the first 9 months of 1969 averaged about the same as a year earlier.

August sales: Total sales of fluid products for August in regulated markets (60 Federal and 5 State) averaged nearly 3 percent below a year earlier. The additional Sunday in August 1969 reduced average sales.

Whole milk sales in August were down nearly 6 percent from a year earlier.

Low-fat and skim milk sales in August were up 9 percent from a year earlier. Total sales for the first 9 months of 1969 averaged 12 percent above 1968 levels.

Milk and cream mixture sales (mostly half and half) averaged nearly 10 percent below 1968. Sweet and sour cream sales were down 7 percent from August 1968.

Milk receipts: September receipts of milk from producers at plants regulated for 62 marketing areas (58 Federal and 4 State) were up 3 percent from a year earlier. The number of producers delivering milk to plants for these same markets was down 4 percent from September 1968.

Milk production: U.S. milk production in October was estimated at 9.2 billion pounds--up 0.3 percent from a year earlier. October output provided 1.45 pounds of milk (for all uses) per person--down 0.7 percent from a year earlier. Daily average production during the first 10 months of the year was 0.7 percent less than in 1968.

October milk production equaled or surpassed a year earlier in all Atlantic States except New Jersey and Delaware. In the North Central States, production was above a year ago in Michigan and Wisconsin, unchanged in Ohio and Kansas and down elsewhere. In the South Central and Western Regions, production changes from October 1968 were mixed: up in 9 States, unchanged in 1 and down in 9 States.

1/ Regional and U.S. average based on prices for individual markets weighted by population. Prices for Federal-order markets include prevailing premiums above minimum Class I prices, as reported by principal producers' associations. Premiums may not apply to all Class I milk. Prices in this table do not represent returns to producers. Blend prices paid to producers, based on proportions used in fluid and manufactured products, are shown by markets in Table 6.

# FLUID MILK AND CREAM REPORT

DECEMBER 1969

LIBRARY  
DEC 29 1969

Release:  
December 22, 1969  
3:00 P.M. EST

## MILK PRICE HIGHLIGHTS

Class I prices: December prices paid by dealers for milk used for fluid purposes (Class I) averaged \$6.98 per cwt. for about 155 markets -- up 5 cents from November and 29 cents above a year earlier.

Regional averages ranged from unchanged to 14 cents higher than in November. Compared with a year earlier, regional prices ranged from 20 to 34 cents higher, according to the Crop Reporting Board.

Store milk prices: Store prices to consumers in 25 cities during early December averaged 56 cents per half-gallon for whole milk. The December price was nearly 3 cents above a year earlier.

Home-delivered prices: Half-gallon prices for home-delivered milk averaged nearly 64 cents per half-gallon. This was  $\frac{1}{2}$  cent above a month ago and 3 cents above a year earlier. Home-delivered prices represent list prices before quantity and other discounts.

SALES OF FLUID DAIRY PRODUCTS AND RECEIPTS  
OF MILK FROM PRODUCERS

Preliminary October sales: Preliminary data for October on average daily sales of fluid dairy products in 65 marketing areas (60 Federal and 5 State) averaged 1 percent above a year earlier. Total sales for the first 10 months of 1969 averaged about 0.5 percent above a year earlier.

September sales: Total sales of fluid products for September in regulated markets (60 Federal and 5 State) averaged 3 percent above a year earlier. September 1969 had one less Sunday than September 1968 -- this contributes to the increase in average daily sales.

Whole milk sales in September were 0.5 percent above a year earlier.

Low-fat and skim milk sales in September were up 15 percent from a year earlier.

Milk and cream mixture sales (mostly half and half) averaged 4 percent less than 1968. Sweet and sour cream sales were down 1 percent from September 1968.

Milk receipts: October receipts of milk from producers at plants regulated for 62 marketing areas (58 Federal and 4 State) were up  $1\frac{1}{2}$  percent from a year earlier. The number of producers delivering milk to plants for the same markets was down  $3\frac{1}{2}$  percent from October 1968.

Milk production: U. S. milk production during November was estimated at 8.7 billion pounds -- down 0.4 percent from a year earlier. November output provided 1.42 pounds of milk per person for all uses -- compared with 1.45 pounds a month earlier and 1.44 pounds a year earlier. Daily average production January through November 1969 was 0.7 percent less than in 1968.

November production equaled or exceeded a year earlier in all North and South Atlantic States except New Jersey and Delaware. In the North Central Region, production advanced slightly in Ohio but declined in all other States. In the South Central and West, production was up in 11 States, unchanged in 2 and down in 6 States.

1/ Regional and U.S. average based on prices for individual markets weighted by population. Prices for Federal-order markets include prevailing premiums above minimum Class I prices, as reported by principal producers' associations. Premiums may not apply to all Class I milk. Prices in this table do not represent returns to producers. Blend prices paid to producers, based on proportions used in fluid and manufactured products, are shown by markets in Table 6.
